Keywords. INNO3D, 3D Printing, librarians

Abstract.

The article will outline the 3D Printing Support Service for Innovative Citizens (INNO3D) project, which aims to develop tools to train Librarians in using 3D printing to have the skills to teach library users to use 3D Printing effectively. The project which also has partners from Romania, Greece, Slovakia, Spain, and Portugal will enhance the quality and relevance of knowledge and skills of librarians to teach people in 3D Printing leading to the reshaping and re-imagining of library services in EU countries.
